Production of the product under investigation

	Quantity (in metric ton)
Actual production quantity	
Maximum production quantity	

3. Activities of your company and related companies

- (1) Give details of the precise activities of the company and all related companies (please list them and state the relationship to your company) involved in the production and/or selling (export to the R.O.C. and/or

domestic) of the product under investigation. Such activities could include but are not limited to producing upstream inputs used in the production of the product under investigation, purchasing the product under investigation or producing it under sub-contracting arrangements, or processing or trading the product under investigation. Provide details concerning the type of relationship and include relevant supporting documents.

(2) Please provide information on related companies and the details of transactions with them, and **attach the relevant supporting documents.**

Company name and location	Transaction volume (in metric ton)	Telephone, Email address and Website	Type*

*The company is a/an producer, exporter, trader, importer or other entity involved with the product under investigation.

4. Other information

Please provide any other relevant information which the company considers useful to assist the Ministry of Finance (MOF) in the selection of the sample.

5. Characteristics of products affecting price and cost (**for Control Numbers in the questionnaire**)

To ensure a fair comparison between the export price and normal value of the product under investigation, the MOF will design Control Numbers (CONNUMs) based on the physical characteristics that significantly affect the selling price and production cost of the product under investigation, namely commercially significant price factors, for inclusion in the questionnaire.

If there are any suggestions concerning the CONNUMs, please provide the characteristics you believe should be considered when designing them and describe in detail how these characteristics can affect both the price and cost of a product. The MOF may incorporate your suggestions into the questionnaire.

6. Certification

By providing the above information, the company agrees to its possible inclusion in the sample. If the company is selected to be part of the sample, this will involve completing a questionnaire and accepting a visit at its premises to

verify its response. If the company indicates that it does not agree to its possible inclusion in the sample, it will be deemed not to have cooperated in the investigation. The MOF's findings for non-cooperating exporting producers are based on facts available and the result may be less favorable to that company than if it had cooperated.
